

VERIFY EVERY CLAIM. CITE EVERY VERDICT.

We use a 7-agent LangGraph DAG to verify every prior-auth decision against FHIR clinical data and NCCN-cited payer policy. No more 14-day fax-fights. No more denied appeals.

1 FHIR-native extraction

2 NCCN-cited reasoning

3 Auto-drafted appeals

VERIFY CLINICAL. CITE POLICY.

Join the next generation of provider-side prior-auth systems. Every Authrex verdict is bound to a FHIR resource, every appeal grounded in NCCN guidelines – not LLM opinion, not unreliable extraction.

94% of physicians say PA delays care

80.7% of appealed denials are overturned

Prior-Auth Copilot

AeroFyta

AUTHREX

The Auditable AI Copilot
for Oncology Prior
Authorization

Never Wait Another Week

From 14-day fax-fights to denied appeals, we eliminate the friction. Our 7-agent DAG verifies every claim against FHIR data and payer policy in 60 seconds — citation chain attached.

FHIR-native ingestion

60-second decisioning

Citation-grounded verdicts

Verdicts That Actually Cite.

FHIR-native clinical extraction combined with NCCN-cited policy reasoning creates the world's first auditable oncology prior-auth platform — every claim sourced, every byte reproducible.

- 1 Clinical citations from FHIR (60%)
- 2 Policy citations from NCCN/payer (40%)
- 3 SHA-256 hash-chained audit ledger
